11/3/2020 10:07	Davis Bossie [REDACTED] 8583)	Incoming	Message	No	Davis Bossie [REDACTED] 8583)	Mark Meadows [REDACTED] 2544)		Mark, Following up on our conversation from last night on the potential legal battle we are facing. Paul Clement at Kirkland would be first choice. Miguel Estrada at Gibson Dunn or Noel Francisco at Jones Day also would do well. Such a big part of this job is the comms. Ted crushed that in 2000. You need someone who can effectively make the case on Meet The Press etc. The legal QB also needs sufficient gravitas to lead all the volunteer help and to set aside the views (often publicly expressed) of how he shld do the job. This guy needs to be able to get 200 lawyers at 20 different firms to row in one direction. Also needs to be able to tell many of them to shut up. Ted's home number is [REDACTED] 9652. I had his partner Matt McGill call him this morning and he is happy to get the call. Let me know if I can do anything else and thank you for all you are doing for President Trump. Let's win this. Dave.

11/3/2020 18:35	Andy Biggs (██████████ 7951)	Incoming	Message	No	Andy Biggs (██████████ 7951)	Mark Meadows (██████████ 2544)		This is the latest. We've expanded our leader Democrats to well over 30,000 votes. Also I called my consultants again and they tell me that the independence are probably breaking even better than two or 3% for Trump because they're so active today. And that an independent voting for Biden would've already done it through mail in ballot because they don't trust the Covid. Ha ha

Higher turnout in both, Biden running a couple points ahead of how Clinton performed in 2016. Again, still waiting on 100K votes or so in both counties, but good signs for Ds there. (8:34 PM)

DON'T MISS THIS! SO IMPORTANT! NS@ can track the Media data packets to trace election fraud. Here's how: Voting Equipment is how they are winning these states. I am so concerned that it is being overlooked by you and our President. This is traceable by tracing Media Data packets. It is mainstream info that they have invented cellular modems in the tabulators! I argued with folks on the Presidents original election integrity commission because when the President asked if it was the machines I (Christian Adams) said NO it is not the machines. We now have forensic evidence from Pete Sessions 2018 race that proves he was very wrong. Look at the Kevin Freeman Show on the Blue Nile interview. one of Congressman Pete Sessions technical team members. I put an abbreviated clip at the bottom as I know your time is limited. When we look at Pete's race we see how they were able to corrupt the vote. This is not a singular incident and now with the forensic evidence we know this is happening across the country. We now know those meta data packets are traceable. Get a hold of former NS@ Bill Binney who built the automated systems that still run our modern day NS@. He knows exactly how to solve this problem Mark. Again Bill Binney's automated technology was so advanced when it was developed it is still being used today in the NSA! Bill has been waiting for the President's call. He is ready willing and able to solve these problems with our President. Notably President Trump had the inclination to call Bill. President Trump's instincts were right. Pompeo told Bill that President Trump had wanted him to call him on the Russia conclusion delusion and give him the information to take back to the president. Pompeo's report to the president is unknown at this time. During the meeting Pompeo was informed that the President's own Agencies were spying on him. At that time Bill told him he knew how to prove it and could solve the problem. Bill has a secret weapon and the key to unlocking everything and busting everyone. This is not an overstatement. https://billbinney.com/news/ Do not let the articles that talk about the Democrats suing the Republicans in Georgia throw you for a loop. Those Republicans are RINO/global cab@. I will post the link in the message below this. https://www.salon.com/2019/10/06/why-over-130000-new-voting-machines-could-lead-to-more-distrust-in-us-elections_partner/ https://whowhatwhy.org/2020/05/27/touchscreen-voting-makes-everything-easy-including-hacking/ https://www.nbcnews.com/politics/elections/online-vulnerable-experts-find-nearly-three-dozen-us-voting-1112436 https://youtu.be/EaBD5ubHDWw ??????????????Pete Sessions 2018 Race (how they are cheated) I believe the president is going to win tonight. Because the true numbers are red landslide for the president a landslide. We can see that by the rallies those are live polls. They are cheating more than you could possibly imagine. They did put 130 000 of these machines in the swing states. Arizona has a bunch of them that's why we lost Arizona. President Trump won Arizona they are cheating! We are going to continue to lose elections across the country if we do not solve this problem with the massive fraud happening through these tabulation machines. Georgia is one of those states. They've got the new machines with the cellular modems in their state. One more thing bills technology we could cross reference in minutes to see who voted who was a real person who was a real person etc. etc. We could find all of the trafficking ring we can track all the money in minutes you have to get a hold of Bill Binney please Mark. We won't always have this dynamic of a candidate. We have to solve this problem. I really wanna be part of this. I am available my kids are all grown @m ready to put my whole hean and full time exposing this just fraud in Jesus name faithfully Tomi Collins

There are still 1M Election Day voters out there waiting to be counted - we pushed our people to vote on Election Day, but now Fox is trying to rig alone their votes. We only need 61% of the remaining votes in Arizona to win. The votes are coming from @our countries @ and the 61% figure is very double loaded on what our other Election Day voters are looking like</a>

If we end up winning Arizona and/or Nevada, PA will find whatever they need for Biden. If they don't need PA, they will let Trump have it. If something happens in MI, they will add PA back in. And so on. PA is their backstop. Remember, the least amount of cheating they need to do is best. With every incremental cheat comes an increased risk of getting caught. But they are all-in. We will need recounts in WI, MI and maybe PA. Preferable, people should have to vote, again, in person. This is important.... if half the country thinks there has been fraud, and if everyone agrees that we should have a fair and honest election in which every vote counts.... let's do it again in the states that screwed up their counts.

11/4/2020 12:17	Nayeli Marin (5011)	Incoming	Message	No	Nayeli Marin (5011)	Mark Meadows (2544)		<p>Mark: Woody Jenkins sent this to me to pass on. I am passing to you. You may recall he was cheated out of a senate seat by Mary Landrieu in 1996. He rigged all the way to a senate vote but lost due to it being Dem controlled. WHAT TO DO? First you want a fair vote count of the votes that appear to have been cast eliminating those which on the surface do not comply with the law such as multiple voting or ballots that do not have signature of the voter. Second you want to gather the information necessary to challenge the results of the election. Bear in mind that once an election is certified that will carry more weight with the courts and the public. So try to delay certification until all issues have been resolved. However the detailed information you gather is an essential and persuasive part of a challenge. Third understand that elections can be challenged based on one of two things: 1. vote by vote and/or political machine corruption. Sometimes the corruption is so great that it is impossible to determine the outcome. A vote by vote analysis may change the outcome. Proof of political machine corruption could result in a determination that the actual results are unknown and a new election should be held. There are many things that need to be done in states targeted for review. None are easy. 1. Many of the issues will involve mail-in ballots. Other issues will involve in-person voting. Others will involve the fairness of the election itself. 2. Remember: There are legal safeguards built into the voting process but these safeguards only matter if at least one candidate is willing to exercise his rights and question the conduct of the election. To do so invites the wrath of the world from the media your opponents and even some of your friends who will claim you are a loser because you demand a fair vote count. People want a quick resolution and demanding a fair count or challenging an election is anything but quick. 3. Above all getting a fair vote count involves access to the basic documents of the election. Those documents will reveal most of what you need to know. The people who support the fraud will do anything and everything to prevent access to those documents. 4. Determining the actual vote will take large numbers of capable people. WHAT YOU ARE LOOKING FOR: The documents of an election create a paper trail that can help decide whether any particular vote was cast legally. There are countless ways to steal votes when paper ballots are involved. This is why our system uses automated voting machines. The move to paper ballots in recent years and especially this year is an open invitation to fraud. However paper ballots are only one problem. To expeditiously identify large scale fraud here are things you must look for: 1. MISMATCHED SIGNATURES - Compare the signature on the mail-in or in-person ballot with the signature on the voter's original voter registration card. Signatures that don't match must be identified and tabulated. These are called Mismatched Signatures. 2. MULTIPLE VOTING - These are from people who have cast more than one vote. Were large numbers of ballots mailed to one location? More than the number residents of that household who were eligible to vote by mail? Some people may have voted by mail and on Election Day. Some states have systems that automatically detect and prevent that. Other states do not. In states that do not have such a system a mail ballot must be cross checked against the ballots cast in-person. This problem is much greater when ballots are counted that arrive after the election. All must be cross checked. When people request more than one ballot sometimes they use their own name more than once. Sometimes they use their maiden name or someone else's name. Sometimes names are simply made up. Vote fraud can be individualized and personal or it can be organized and systematic. Obviously organized fraud produces more legal votes and is the far greater problem. Multiple voting can also involve people voting at multiple voting locations on Election Day. This can occur in a highly organized way as when large numbers of voters haul 8 to 10 people to multiple voting locations. This can produce large numbers of legal votes. How is this possible? With the cooperation of corrupt commissioners. Always there is a paper trail. Is there a signature on the voter roll for every vote on the voting machine? The lack of signatures and mismatched signatures can be tangible evidence of multiple voting. 3. PHANTOM VOTE - These are votes which are obviously illegal but not tied to a particular voter. They are evidence of political machine corruption but may sometimes be used on vote by vote basis. Examples: There were more votes cast in the precinct than there are registered voters in that precinct. Or there were more votes cast than people who signed the precinct register. So if there is a precinct with 300 registered voters but 400 votes were cast you have 100 phantom votes. These are votes put on the machine by corrupt commissioners. Or in that same precinct if 200 votes were cast by mail and 200 votes were cast in person once again there were 100 phantom votes. A phantom vote is a vote for which there is no person. In the precinct with only 300 registered voters candidate A carried the precinct 390 to 10. Then you know candidate received at least 90 illegal phantom voters and those can be deducted from his total. There are many other types of legal votes all of which need to be investigated. It is a long difficult process. Our system is made for an honest and moral people. It is not work for any other. Former Rep. Woody Jenkins who challenged the vote fraud in the 1996 U.S. Senate election in Louisiana.</p>
11/4/2020 12:18	UNKNOWN (8626)	Incoming	SMS	No	UNKNOWN (8626)	Mark Meadows (2544)		We need to have as of several hours ago VERY attentive people in EVERY location in those states where the. Allots are being held. They need to document every new arrival / departure of ballots from those locations. They need to document how those ballots are being secured. We need to demand segregation of all different types of ballots and ballots that have apparent defects (eg no signatures etc). We need to get word to those people how to ensure they document issues in ways that will be accepted by state courts under the applicable rules of evidence. This will provide the record for any emergency legal challenges. I'm sure Justin et al are all over it, but this is the basic framework.

It seems to me that it may be time for a compilation video be out together and made available to media, shared on social media and maybe have it ready for Sunday shows with talking points. There are so many ranging from this sort of thing, the sharpies, the ballot dumps, the post office whistleblower, etc and maybe include some bios of some of the people involved. For example, the guy in Fulton County in charge of the count who currently being prosecuted for felony corruption. MSM will be talking 24/7 about every vote and our side needs to talk about fairness and integrity. Every single vote that is counted that wasn't cast legally by a legal voter cancels out legal ballots of the law abiding people. In the video above... that guy crumpled up and threw away your vote. Not fair. President Trump, as he has always done, will fight for every American. Every single one.

Net gain of 10,783 for President Trump. Trump is still in line with what he needs to catch up statewide. But, it will be close.

Sharpies. This is real and it's massive. Suggestive of a coordinated effort. If it happened in coordination across state lines - that's criminal at Fed level. 2. Vote counting. Poll watchers across the country have officials destroying ballots on video. 3. Vote destruction. Videos of people with bags full of videos being burned and otherwise destroyed. (Reminds me of other antifa activities. Coordinated and paid for by someone) On the other side, irregularities and statistical impossibilities. 1. 138k found ballots with zero for one side. This isn't the only case. It's happened in NC, WI, PA and GA, all in dem states and cities. 2. Counting rooms closed to republican. Nevada made it illegal for republicans to even enter the buildings for mail in ballot counts. But in GA, for example, the Fulton County room is being run by a dem prosecutor who is under investigation for felony corruption and same guy who charged the cop with murder for one of these BLM incidents. 3. Post office. Ballots are being expressed into the count. These include ballots that are being hand-stamped with Nov 3 post marks and rushed into the ballot area. 4. Ballot harvesting. Already they are finding the tradition dead out of state double ballots the dems are known for but also vote totals for dem turnout are in excess of voter rolls. Combined, they reduced R votes and increased D votes. That's why we see the irregularities inside Republican districts and in traditional dem strongholds. They attacked both. Now I will tell you what I think: I believe Trump won massively. I think he won Wisconsin and Michigan by maybe as much as the same margin as Ohio, PA, NC, GA all for Trump by hundreds of thousands of votes. Remember, internal data had Trump winning all these states and even the popular vote. Don't confuse with MSM polls. They were intended to deceive people. Trump won and the fraud is massive. Massive. Maybe 1-2 million votes. Maybe more. And the dems will never concede. They will riot before the recounts and they will go ape-shit crazy as the MSM begins to declare victory for Biden. Social media will turn off all voices not of the same mind. We need to get ahead of this. This could get serious. Very serious. Thomas Jefferson, James Madison and George Washington kinda serious. Not kidding.

So, what would I recommend to President Trump? I'm no expert but here are some good ideas: (1) challenge the late-night finds in the courts; (2) hold rallies in contested states; (3) urge GOP officials in close states to expose shenanigans and, if necessary, to refuse to seat Biden electors in the event of a fake count; (4) mount a campaign to marshal grassroots public opinion in the president's favor. Convince the people that if in fact the election is in the process of being stolen, the president and his allies are going to fight the steal on their behalf. If middle America wants to prevent this election from being stolen, it will have to be willing to act now. I know they are willing, but they need to hear from the President and his best surrogates. I'd get Trump on Tucker, tonight, to explain his plan.

Not just the narrative (because that's excused away at a media thing). They have been in control of this fraud. It's years old now (2016) but I will be more specific... Coronavirus >> Mail in >> Voter Fraud It's a straight line. We MUST break their plan. We MUST take control. We've waited too long and allowed them too many opportunities. Mark - it's a Marxist coup. It always has been. The decision is coming and it's binary. President Trump will have tremendous pressure from MSM and riots on streets to concede to the will of the voters and hand the country over to these cheating Marxists. Or President Trump will not concede because he knows (as do 65m voting Americans) that the election was rigged. Now... the people behind all of this - they want either outcome. They want to either take power for themselves or to weaken America. We must change the game. We are playing their game. We need to get them off of their pre-planned script and onto one of our own. Here's an idea... A federal raid and arrest of whoever stopped the 138k ballots at 4:30 am in Detroit. It was witnessed. There must be video of the cars pulling up. Of the people walking into the building. Of the hand off. Etc. Bring them in for questioning. Break them. And start moving up the chain. Same for the sharpie pens. Go to those polling stations. Bring them in for questioning. Break them. Move up the chain. That's how we broke the mob. That's how most criminal operations are broke. Start with the lower levels and get them to turn. Let's change the game.

Biden takes GA and AZ and PA are irrelevant in getting to 270. While we're being divided on multiple front Dem counties just keep finding more ballots. A nationwide injunction must be issued here to stop the counting of all ballots. As soon as Biden goes ahead in GA you can't put that toothpaste back in the tube.

If he does this as a tweet and asks for a simple reply. Example for me (I actually checked mine, and it hasn't been counted) State: CA Voted for: Trump Vote Counted: No It would be a very interesting way to expose voter fraud and the media would be forced to report on the result.

Again, not a lawyer and not advocating for some extreme position. But Twitter is censoring the president as he is trying to communicate to the country that the election results are being manipulated. That would be like broadcasters not allowing Roosevelt to announce the attack on Pearl Harbor.

11/6/2020 10:12	Wendy Murphy (██████████1568)	Incoming	Message	No	Wendy Murphy (██████████1568)	Mark Meadows (██████████2544)		Why are we not pursuing this strategy? Section 1 The executive Power shall be vested in a President of the United States of America. He shall hold his Office during the Term of four Years, and, together with the Vice President, chosen for the same Term, be elected, as follows Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors, equal to the whole Number of Senators and Representatives to which the State may be entitled in the Congress but no Senator or Representative, or Person holding an Office of Trust or Profit under the United States, shall be appointed an Elector. I found this, this morning please note the yellow portion. We have to pull out all the stops Bobby! The 1892 Supreme Court case McPherson v. Blacker dealt with this precise issue. Michigan had passed a law dividing the state into Congressional Districts, and granting its electoral votes to the winner of each individual district. The law was challenged, and the Court upheld it. In its ruling, the Court found that state legislatures have a plenary power to decide their electors; in other words, their authority on this question is complete and unlimited. The Constitution does not provide that the appointment of electors shall be by popular vote, nor that the electors shall be voted for upon a general ticket, nor that the majority of those who exercise the elective franchise can alone choose the electors. It recognizes that the people act through their representatives in the legislature, and leaves it to the legislature exclusively to define the method of effecting the object. [Justia] McPherson also approvingly cites an 1874 Senate report, which stated quite explicitly that state legislatures have the power to take over the appointment of electors at any time. The appointment of these electors is thus placed absolutely and wholly with the legislatures of the several states. They may be chosen by the legislature, or the legislature may provide that they shall be elected by the people of the state at large, or in districts, as are members of Congress, which was the case formerly in many states, and it is no doubt competent for the legislature to authorize the governor, or the supreme court of the state, or any other agent of its will, to appoint these electors. This power is conferred upon the legislatures of the states by the Constitution of the United States, and cannot be taken from them or modified by their state constitutions any more than can their power to elect senators of the United States [ Revolver note: The power of legislatures to elect senators was later removed via the 17th Amendment]. Whatever provisions may be made by statute, or by the state constitution, to choose electors by the people, there is no doubt of the right of the legislature to resume the power at any time, for it can neither be taken away nor abdicated. [Justia] The McPherson decision is still standing precedent, and its meaning is clear. The legislature of any state may, at any time, reclaim its authority to appoint electors. Obviously, in a normal election, there is no need to do this. But if the election is going to be otherwise stolen, they have a moral duty to act.

Needs to be done instantly 2) The President should have one lead spokesperson organizing daily public press briefings that credibly lays out the facts communicated in an effective way to separate it from the opinions which also need to be shared. That person needs to give an update of the state of play state by state, including a top line summary of where each battleground state stands with the count, projections, possible recounts, legal actions, vetted voting irregularities, unvetted alleged voting irregularities (make clear that the campaign is intensively reviewing those claims for vetting purposes). The simple fact is this election is far from over. Joe Biden has not been certified as the winner of any states, let alone any of the highly contested states headed for mandatory recounts, or states where our campaign has valid and legitimate legal challenges that could determine the ultimate victor. ◆ Beginning Monday our campaign will begin prosecuting our case in court to ensure election laws are fully upheld and the rightful winner is seated. The American People are entitled to an honest election; that means count all legal ballots, and don't count any illegal ballots. This is the only way to ensure the public has full confidence in our election. It remains shocking the Biden campaign refuses to agree with this principle and wants ballots counted even if they are fraudulent, manufactured, or cast by ineligible or deceased voters. Only a party engaged in wrongdoing would unlawfully keep observers out of the count room ◆ and then fight in court to block their access. ◆ So what is Biden hiding? I will not rest until the American People have the honest vote count they deserve and that Democracy demands. ◆

In 2016, Philadelphia County made up 11.3% of the total vote in the state. ♦ As it currently stands, Philadelphia County only makes up 10.2% of the statewide vote tally. So POTUS performed better in a smaller share. Sen. Santorum was just making this point on CNN - cuts hard against the urban vote stealing narrative.

Vote tabulations running yo keep up with an election that was well outside it's programming. That's why people saw (and recorded) on TV vote counts going up and down in equal amounts for candidates facing each other for election. Just like I am not a lawyer, I'm not a computer engineer or programmer. But my CTO is talking with mathematicians, computer scientists and the like (all MAGA) and they are convinced the evidence is easily mined from big data. Anyway... thats enough for tonight. This is really crazy I feel like screaming... wow look at the band-wagoners! we've known about this for two years and been trying to get this info through to be analyzed for two years. There's so much more to the story. <a href="https://youtu.be/fVDB8_JWL0c">https://youtu.be/fVDB8_JWL0c</a> amazes me how people walk around and so pumped up in themselves and their own advancement that they can't even listen ?? I tried to get this information and much more info to Tom Finton. Sidney is a good girl she knew about it and she was listening but Tom was prideful!!! People with President Trumps original election integrity group they're stupid and naive. They were all telling me this was a conspiracy theory the voting machines were a conspiracy theory! Bullcrap! Now they want to talk to me AFTER THEY HAVE NO ACCESS TO THE PRESIDENT! I'm like little late BUCKO! Thank God Pete Sessions discernment to listen so he could capture the evidence but I feel I'm still being blocked. There's so much more to the story the president needs to get Bill Binney inside of his office to kick butt on the intelligence community and solve this problem beyond a shadow of a doubt! Yet nobody has yet had the balls to tell him to call Bill! We would have been out in front of this... I have so much more evidence. And now these people are coming on like whoooooo break in story. I can't handle it! JESUS HELP! I am getting reports from attorneys that the president still doesn't know about this stuff. People are pressing him to concede. They are losing lawsuits left and right. Cuz they don't know the Intel that will back these eye witness claims. Campaign Attorney continue to loose because they don't have all of Intel to go w/ the irregularities. POTUS is relying on corrupt intelligence community! He need to at least be reminded of Bill Binney!! In days Bill can track and present hard core evidence. Anyway I'm really upset, I need a RESET Jesus. Please get Bill Binney on the team Mark. I want in w/ attorneys I have intel they are not using that will complete their suits. Praying like never before! Tomi Collins I just got over Covid a few weeks ago. Kris Cramer Kevin's wife and I seem to have passed it to one another on our walks. I'm praying for you.

But while fighting fires someone needs to immediately do whatever needs to be done to make sure GA senate runoff is secure. The mail in ballots are going out on two weeks and the same voting machines that glitched last week are the machines in GA. My research suggests they were installed in 2019 (just in time). I experienced the Democrat Board of Elections in 2018, throw out 282,000 votes of our district, and order a new election because of ♦aint ♦ Dowless ♦ indictment, when all was said and done, was for taking possession of 2 absentee ballots and mailing them for those 2 people in the general election of 2018. That ♦s right.....282,000 votes tossed away and new election ordered over 2 questionable ballots. (Which he still denies and has yet to get his day in court). Revisiting this for a specific reason. When you watch this and understand that the voting system used in MN is the same as 30 other states... and that what is shown here happened EVERYWHERE - then you understand. The machines in MN had the same programming. They flipped votes from Republican to dem candidates. This was done, the evidence suggests, on a 1:1 ratio. It wasn't just the presidential race. It was up and down the ballot. We need a complete audit of every race across the country - including our state. I heard from Ron Ebensteiner that Trump lost his base voters in the outstate areas. Meaning, he carried fewer as a percentage despite winning the outstate counties. This is absurd. If anything he further dominated. Worse - we missed retaking the statehouse by two seats. The DOMINION (Nancy Pelosi & Diane Feinstein) machines were used to keep MN blue and maintain Walz emergency powers. Work with Gazelka. We need a full audit and recount movement. ??

After many discussions with men and women in my peer group, and others involved in policy strategy concerning the potential corruption in the voting process here is my \$1.27 worth, which will not get you a cup of coffee at starbucks, but is free of charge moving forward: 1. We must urge the President to tone down the rhetoric, and approach the legal challenge firmly, intelligently and effectively without resorting to throwing wild desperate haymakers, or whipping his base into a conspiracy frenzy. 2. Goal 1a is to get the president re-elected by counting every legal vote through recounts in states where the margins qualify, and filing lawsuits in states where there is enough circumstantial voting irregularities evidence to justify the legal action. 3. Goal 1b is to expose corruption where found in a way that motivates public officials to bring about effective change to the voting process which brings meaningful and effective election reform allowing for every vote to be counted in an open/transparent and fair manner to all parties the end game for future elections is for a clear winner to be declared and accepted by all parties. 4. Once the final determination has been made, if we lose, we have an orderly transfer of power, and push hard for election process reform so that this does not happen again if we win, full speed ahead on all conservative fronts. 5. This process must not jeopardize the Senate runoffs in GA by turning moderate republicans and independents against our party we must turn out our people for these runoff elections. I am preaching to the choir, but had to get this off my chest we must not let the more flamboyant members of his advisory team rule the process and screw this up there is a lot on the table for us to win. God bless each of you every day Bill

We just discovered at least ~140,000 votes MINIMUM - were transferred from President Trump to Biden based on the analysis I shared for just these THREE counties. It appears they used the SAME algorithm on these three counties. Can you get us Antrim, Genesee, Washtena, Kalamazoo, & Ottawa Counties. These are counties w more than 200K residents. This analysis even with what we have now is a SLAM DUNK, without hyperbole, to show an algorithm was in place to steal votes from Trump, in Republican precincts, in a graduated fashion to Biden. For each of the above counties, we can do it on our own, or if you have a guy who can get us the precinct level data for each county (above) that includes candidate votes as well as straight party votes that will expedite our work. We can do this for Wisconsin and others. Do you want us to get ready to make a formal presentation so other can vet, play Devils advocate, and challenge us?

There are lots and lots of folks who are just not informed and have been duped. They have been duped by very, very powerful people who want to destroy our constitution and end our republic. In the simplest of terms, the rhetoric of the past four years has left many on the left who would otherwise be good & decent people confused and angry. What they don't know is that there is a war going on inside of our government and it's playing out on TV and social media. It's not for the hearts and minds of Americans. It's for America. Traitors inside our intel agencies have turned their great power against our people! They are doing this with and in coordination for certain members of the Democratic Party. Absolute power has corrupted them in the absolute. It's treason. They have used these tools to frighten and confuse the populace, resist the will of a duly elected president, impeach him and deprive him of re-election by way of a massive voter fraud scheme. Guys.... 70 million Americans voted for President Trump. 70 million. Maybe more (Hammer & Scorecard and other fraud) once we unravel the mess. I believe that the majority of the country is with the president. What message can be sent to the American people that will serve to inspire and provide hope as the fraud and its conspirators are revealed while also serving as a call to action for loyal, America-loving patriots who need now be more vigilant than ever before? Remember, millions have been duped. It's not their fault. We only need them to trust the process. As for the conspiracy - I once again want to remind that the mob was broke when the lowest level goons spilled the beans on those above them. And so on... all the way up. Maybe the president should publicly offer pardons for lower level actors who confess now and describe their roles and name their co-conspirators. Civil lawsuits and recounts should run side-by-side with public arrests and prosecutions. People need to see the criminal actors arrested to better understand the more intellectual subtleties of civil cases. Thanks for listening.

I wanted to share this with you and get your thoughts... I sent this to friends close to SOS office here in Ga with no response yet, I would like your take on this. As I review the vote tallies state wide, if I look at the numbers correctly, it appears approximately 26k absentee ballots were cast only for Biden with no other down ballot votes, this is statistically irregular and inconsistent with the absentee ballot behavior in the rest of the races and a pattern not duplicated on the R side. Can these ballots be identified and challenged, I would think a "blind" signature confirmation test would be only way to verify...I can't get an answer on how the absentee ballots are validated and secured here in Ga but with Biden having nearly 2x the absentee ballots as Trump, a prime area for malfeasance is obviously with the absentee ballots....on ballots cast with an id in Ga which represented 73% of the vote, you guys won hands down 55/44....thoughts?

Mark - I've got even better news. We just discovered at least ~140,000 votes MINIMUM - were transferred from President Trump to Biden based on the analysis I shared for just these THREE counties. It appears they used the SAME algorithm on these three counties. Can you get us Antrim, Genesee, Washtena, Kalamazoo, & Ottawa Counties. These are counties w more than 200K residents. This analysis even with what we have now is a SLAM DUNK, without hyperbole, to show an algorithm was in place to steal votes from Trump, in Republican precincts, in a graduated fashion to Biden. For each of the above counties, we can do it on our own, or if you have a guy who can get us the precinct level data for each county (above) that includes candidate votes as well as straight party votes that will expedite our work. We can do this for Wisconsin and others. Do you want us to get ready to make a formal presentation so other can vet play Devil's advocate and challenge us?

Kory says the gist of their argument is that Biden has 270+ electoral votes and what happens in AZ is irrelevant. ◆ As Kory is not authorized to promise that Trump/RNC will cover any costs if the judge does what Hobbs wants the RPA could opt out of the suit now and protect itself against this financial risk. Once again, internet sleuths have done an amazing job reverse engineering mountains of public information to distill a clear picture of what occurred on the night of the election. Here's what we are now beginning to understand: Electronic vote miscounting, swapping and deletion of the tabulating machines from Dominion Voting Systems, Premier Election Systems (owned by Dominion), and another vendor still unknown were programmed to generate phantom votes for Joe Biden. The number of phantom votes created by the machines was algorithmically determined based partly on the number of registered Republicans in the precinct being counted and using a method called weighted race allocation methodology of the counting machines. The second phase of electronic manipulation occurred when specific triggers were hit during the night, basically a judge factor to try and place a collar on the phantom vote creation. This is what's being referred to in the media as "glitches." During one of these glitches, blocks of votes were instantaneously swapped from one candidate to another, or blocks of votes were simply erased. Nearly every time a block of votes were transferred, it was votes for Donald Trump into votes for Joe Biden, though in a few cases the reverse occurred. It is believed that these block transfers were similarly algorithmically triggered within the tabulating machine. Dr. Shiva Ayyadurai looked at four counties in Michigan: Oakland, Macomb, Kent, and Wayne. In these four counties Trump's margin was decreased by 138,000 votes (89,000 votes were transferred from Trump to Biden). More on this swapping of votes is detailed in the same video: <a href="https://www.youtube.com/watch?v=2u3Y3ooWPKA">https://www.youtube.com/watch?v=2u3Y3ooWPKA</a>. A statement made by Mitt Romney was that these districts were evidence that Donald Trump had lost support from the Republican base in these areas, but the data disproves this theory. If Romney was correct, we would expect to see a flat distribution below an average norm. Instead, we see a linear decline indicating a programmatically driven result. These numbers were machine generated not naturally cast by real humans. For a description of this process and analysis results, check here (another non-de-plum-pedestrian): <a href="https://thesonald.win/p/L4QB2weak/begging-calling-every-pede-to/">https://thesonald.win/p/L4QB2weak/begging-calling-every-pede-to/</a>. A breakdown for each state of the votes that were swapped or lost is listed below. Paper ballot destruction and creation There's an ongoing debate over semantics whether vote counting was stopped or not, however, it's clear that in 6 states vote counting was either delayed, stopped, or GOP observers were removed for a period of several hours. During this period of time, we believe that paper ballots were destroyed. The problem is that the algorithmic creation of votes for Joe Biden falls apart when turnout is incredibly large (which is what happened). The algorithmic approach generates vote totals that exceed the number of registered voters (or even greater than the number of citizens) in a given precinct. We believe that there was a phase of the fraud where actual paper ballots were destroyed in one case, possibly created. It is hypothesized that the Four Seasons Landscaping presser was a veiled threat to conspirators of "We got you" from Rudy Giuliani. Four Seasons Landscaping is across the street from a crematorium and a scan using Google Maps Street View clearly shows security cameras and Four Seasons pointed towards the street. Here's more about Four Seasons Total Landscaping: <a href="https://www.fec.gov/disclosure/disclosure-contributor/contributor-employer/seasons-and-ppp-1000">https://www.fec.gov/disclosure/disclosure-contributor/contributor-employer/seasons-and-ppp-1000</a>. <a href="https://www.cnn.com/projects/ppp-business-sons/businesses/four-seasons-total-landscaping-inc-images">https://www.cnn.com/projects/ppp-business-sons/businesses/four-seasons-total-landscaping-inc-images</a>. The final phase of the night was the delivery of paper ballots. Obviously, Rudy Giuliani has a whistle blower who has come forward and swore in an affidavit that five vehicles showed up at the ballot counting location loaded with boxes of paper ballots. The whistleblower claims that the vehicles all had out-of-state license plates. There is a mathematical anomaly that also occurred that supports this theory: The United States Postal Service uses massive automated sorting and collection machines. These machines and the process of manually carrying carts and storing millions of ballots acts as a random sorting machine, a large card shuffler. When ballots are run through the USPS system, they exit randomly shuffled. There can be a large number of candidates or one suit in this example, but there should still be a random distribution. We saw just the opposite on the paper ballots that were received in the morning hours of Wednesday November 4. It was if you were handed a deck with all diamonds, followed by clubs, then the other suits. The distribution was not random. For an analysis of the time-series data based on the election night feed from NYT: <a href="https://1.acm.org/pov/1604866231896-g">https://1.acm.org/pov/1604866231896-g</a>. Obviously, there are lots of stories of old-fashioned election fraud with ballots being thrown away, lost and destroyed, ballots being cast for deceased Americans, and votes being cast by illegal voters with false ID (or lack of any ID). But, these specific frauds detailed here represent a new level of wholesale election fraud that was the method required to overcome the incredible Red Wave of turnout in support of President Donald Trump and the Republican candidates in this election.</p>

11/11/2020 11:18	Chad Nesbitt (██████████0147)	Incoming	SMS	No	Chad Nesbitt (██████████0147)	Mark Meadows (██████████2544)		Interview is in the editor - Here is the information - Lillie Hollifield Blazer is the woman in Pelican Health Asheville Nursing Home. It is at 1984 US-70 Swannanoa NC 28778. Her neice is Cindy Hensley. She is the person I interviewed and she is furious. She said she looked on the NC Board of Elections website after hearing of voter fraud against the President. She put her Aunts name in the NCBE website and it said she voted. She called the Pelican Nursing Home and they told her a group of people brought ballots in and "assisted" voting with Mrs Blazer. Cindy Hensley says her aunt is mentally catonic and not able to make decisions. Mrs Hensley showed us Mrs Blazers state commitment papers that show she is mentally challenged. Mrs Blazer also signed a statement about what happened and we had it notarized this morning. The statement is being given to a Cindy Davis with the BCGOP before 2pm today. Cindy Davis phone number is 828-301-4738. She is working with local Republican politicians that lost and they have several, if not dozens, of people that was voted in Asheville nursing homes. They want an audit in Buncombe County. They believe the group that voted these people in nursing home is either the Sunshine Movement or the county run MAT which the BCGOP says does not have representation on for a bipartisan group of which the law calls for. The BCGOP President is Jerry Green. The interviews will be online shortly.

Jenna has already booked herself on CNN♦s New Day with Victor Blackwell for Saturday morning. :) Hi Tim, POTUS called me this morning and reiterated he wants announced via a campaign release that I♦m the legal spokesperson for the election integrity effort. He wants me on as much media as possible and helping with TPs and surrogates. He called me this weekend and said the same. Matt Morgan and Jay Sekulow are good with it and the statement should go to Justin for approval, per Bill♦s request. Draft (but modify however you think best): Trump Campaign Appoints Attorney Jenna Ellis as National Legal Spokesperson on Election Integrity♦ Donald J. Trump for President, Inc. is pleased to announce that Senior Legal Adviser Jenna Ellis, a constitutional law attorney, will serve as national spokesperson for the campaign♦s election integrity and legal efforts. Faced with both unprecedented efforts to corrupt a presidential election and a rush to anoint Joe Biden as the victor and deny the American people the right to see every legal vote counted and every challenge to election fraud resolved through due process, President Trump has directed aggressive action to preserve the American constitutional order. Keeping the American public informed of the facts and developments and combatting disinformation will be a crucial element of Team Trump♦s legal election integrity efforts, and the President has the utmost confidence Ms. Ellis♦s ability to do so effectively.

I think it's a reasonable assessment of what's possible there. My thoughts on PA audit and what we should be pursuing with the limited time and money we have. 1. We pushed leadership as hard as we could two days ago and the bottom line in my opinion is they lack the heart and/or think they lack the time and money to do a full audit. 2. We need to see if any addresses had high numbers of mail-in ballots DELIVERED to them. NOT requested from them (that's tied to voter address) but delivered to them. That's a simple database query and sort. Can do it in 10 minutes if we have the data. If there's a coordinated AND provable fraud that would be the big flag. Fraud like driving around harvesting ballots would be near impossible to prove and not a rabbit hole worth pursuing. But if they're getting mail in ballots for inactive/disinterested type voters to be completed for them, and were too lazy to go around and collect them, it would be easy enough to simply have them sent to volunteers/cheaters' homes or similar. Not saying that happened but it may have ... record turnout skewed so heavily to mail in a state where voters are unaccustomed to mail-in, all during a pandemic that killed the ground game for a candidate no one was excited about seems hard to pull off ... and it's easy to check at least one way it may have happened. 3. People think Dominion software was hacked. Well that's why we went to paper ballots ... to have a paper audit trail. Find 50-100 precincts that seem to have gone heavier for Biden than expected and hand count them or even just rescan them. Get the totals and see if that's consistent with what Dominion reported for that precinct and/or extrapolate across a given county, etc. and see if consistent with the numbers reported. Again, could figure out and execute a plan that's easy, cost effective, and would at least rule out mass coordinated cheating. 4. Still think pursuing voters disenfranchised by mandated Covid quarantine is worthwhile but I've been surprised at how little response we've gotten on that front. A few people but not a lot. 5. Our office has found what we think are somewhere between 3-15 dead people who voted in our district alone. Pushing my people to fully vet that by end of day today. That information has been turned over to the attorneys. 6. I wouldn't mess with much else (at least what's within my purview) beyond that other than maybe interviewing or reviewing claims of some cross section of people saying they were denied access to polls. And of course whatever you guys feel the SOS did wrong in regards to following court orders, inconsistent guidance to counties etc. But I'm not sure that requires much of an audit per se.

GA's handling of this election is inexcusable! I'm dumbfounded by the incompetence and utter failure to protect votes. The way they are doing the recount makes it an uphill climb for potus... I'm so upset! Among other things, the signature matching review is a joke, and they are only allowing 1 observer for 10 recount teams. Is there anything else I can do to help? I totally believe that Trump won GA by a significant margin. Incompetence & lack of election infrastructure to secure votes and identify fraud is stunning. I remain hopeful that the recount will help some, and I believe it will likely reveal some irregularities. Unfortunately, it will not be able to expose but a fraction of the real problems in this election.

He may call the Chairman of the Maricopa Board of Supervisors (BOS). Want to be sure he is briefed on what to discuss. 1. BOS has full authority (and obligation) to ensure integrity of the election in Maricopa County. Because state law is being ignored in Maricopa as they are unable to verify/hand audit by precinct (as required by law), a hand count audit of all votes cast in voting centers is necessary. 2. The BOS can ask for increased hand counting before certifying the election. 3. There are potential issues with Dominion systems that MUST be adjudicated before certification should ever be considered by BOS. Call me with any questions you might have. Thx!
11/13/2020 13:50	Andy Biggs [REDACTED] 7951)	Incoming	Message	No	Andy Biggs [REDACTED] 7951)	Mark Meadows [REDACTED] 2544)		So one of the remedies that may still be left is to enjoin the certification of the election based on the Fed only ballots. If we can't get the investigation done in time for that, we should make sure we have it done in time and can demonstrate that a significant number of illegal aliens votes in the election so that the legislature, when called into certify the electors, can reject them based on fraud. What do you think?

I have the following advise for our President: Fight the Legal battle as long as under the Constitution possible. If outcome is not positive, ask him to concede with the message that he will be back for the fight of the United States in 2024. This will work wonders for the millions of Republican voters. That puts a damper on the scared to death Democrats intended movement. With best personal regards, Roger Wacker

It is regarding the statutory requirement to adjudicate computer vote with at least 2% of the precincts in a county. The Secretary of State wrote an election procedures manual (EPM) okaying voting by voting center rather than by precinct. The suit alleges that state law regarding audit takes precedence over EPM. There are 175 voting centers and 748 precincts so theoretically there are potentially more votes to audit at precinct level than voting center level. The BOS has opportunity to shine the light on this.

He should back-channel Biden and have a private meeting, just the two of them .... Make friends ... Tell him it wasn't a narrative accusing him of rigging, but rather a systemic indictment of the process.... Tell him for good of country he's going to stop the process.... Acknowledge Biden as P-elect... Agree that working together to bring fitness and hygiene to this new era of voting platforms is critical to the future of the country... Wish him well And Then in a few weeks ! 45 is heading to 47 begins NOW! ?????MAGA????? Thoughts? Orchestrated right Awesome statesmanship by P Trump! Key is private meeting press doesn't find out about until after or just before and orchestrated by a man to man call from trump to Biden asking for a private meeting ...And then they come out together to announce their mutual review of the situation .. You destroy your enemy's ability to fight. This is what is happening right now--this war is psychological. PSYOP. It's what I did in the military. They are using every weapon they have to try to make us quit, to give up on our system of government and processes. They try to break our will to fight through demoralization, discouragement, division, chaos and gaslighting. It is fake, fraud and if people would take a deep breath and look at things through that filter we will see this through and win. The Constitution is on our side and it is worth fighting for. I believe in it. Our Founders and even those facing Omaha Beach have done MUCH more than we have since Election Day. I would suggest we all think in those terms because if we don't, and we allow this massive fraud to stand, we've lost our country anyway. - Connie Hair, Nov 13?????

11/14/2020 21:19	Sean Hannity [REDACTED] (8777)	Incoming	Message	No	Sean Hannity [REDACTED] (8777)	Mark Meadows [REDACTED] (2544)		NATIONWIDE PRESIDENTIAL ELECTION Several Democratic counties systematically prevented Republican observers from looking at and verifying the signatures on the envelopes of mail-in ballots. In other words, the process of comparing the signature on the ballot envelope with the voter's signature on file with the state was done by one party and hidden from observers from the other party in violation of state laws and regulations. As a result of this partisan signature verification process, it is probable that many mail-in ballots that were counted in the election should not have been counted because the signatures do not match. The question is exactly how many mail-in ballots were counted that should not have been counted? This is very easy to determine... even if the ballots have been separated from the signed envelopes they came in. Our lawsuit requests an independent non-partisan election audit that compares the signatures on the ballot envelope with the voters' signatures on file with the state. In a few days, after a portion of the mail-in signatures are reviewed, the audit will indicate if there is a serious problem that potentially changed the outcome of the election. For example, if this early phase of the signature audit calculates a 5% signature rejection rate on mail-in ballots while the election itself rejected less than 1% of those signatures that means that 4% of the mail-in ballots that were counted in the election were in fact invalid and should not have been counted. Finishing the signature audit of the ballot envelopes will not tell you which ballots were improperly counted because the ballots are separated from the envelopes, however it will tell you, county by county, the exact number of mail-in ballots that were counted that should not have been counted those numbers are all we need to determine if the ballots were counted accurately and the election result was valid. In summary, the only verification of mail-in ballots is matching the signatures on the ballot envelopes to the signatures on file with the state. If you want to see if the mail-in ballots were properly counted and the election was fair...all you have to go back and look at the signatures on the envelopes.

Before I am a woman for Trump I am a Woman for God. I have no regrets. Although controversial President Trump has done more in one term than most in 2 terms! YOU still have our support! Please let me know if we can help you in any way in your next adventure. We all know you have done the best you could under the circumstances. #Meadows 2024! On a brighter note, I am blessed to have been re-elected to the Lee County Board of Education with the highest votes ever for the school board in our county. No one ever really pays attention to the Board of Education. Perhaps I can continue to assist in educating our next generation. Praying for your health, safety and God's guidance as many are praying for unity.

At the table the boss tells a corrupt policeman who is there to serve as a third party witness that he is going to speak to Michael in Italian📌. In the movie they switch languages to keep the policeman in the dark. In this piece📌m going to speak 📌Georgian 📌 not to keep anyone out. but to hopefully add some realistic context to two situations that have been a cluttered media mess in the past week. The recount in Georgia despite assertions by the Secretary of State and some of the local media has been an exercise in futility and disingenuous. Despite statements to the contrary there was a failure to properly authenticate ballots. Consider some statistics uncovered by one of my co-leagues. Data shows that over 15,000 individuals who have moved out of Georgia voted in the recent General Election. Another 8000 inactive voters magically cast a vote in this cycle. Add to that over 14,000📌ow propensity📌 voters who basically have not voted in ten years. Almost all of the votes were cast before the November 3rd same day voting. These are not wild assertions the names addresses and voting history of everyone of those voters has been obtained and verified. My colleague estimates those numbers have a high percentage of fraudulent or illegal votes. None of this will change the course of a recount in which not enough monitors were allowed those allowed in many of the larger counties were forced to observe from a far and signature verification was not even considered. But these dubious voters could have their status challenged for the upcoming runoff yet so far no effort has materialized. And that gets us the two Georgia U.S. Senate runoffs. Let me blunt. The Republican incumbents Perdue and Loeffler are the underdogs. I come to this conclusion not just as a pollster who usually gets Georgia right but who served as a state Representative a GOP nominee for Lt. Governor and as the political analyst for three of the four Atlanta network affiliates. I think I know the place pretty well. And that is where I start speaking📌Georgian📌 When I served in legislature our famed House Speaker the late Tom Murphy used to say as the legislative session was in its last days that we were📌down to the 10📌 (a farming term) meaning time was up for our efforts. The Republican candidates in these Senate races are down to that📌ick lag📌 Advanced in-person voting starts in less than a month and absentee ballots start being mailed this week. And while former state Representative Stacey Abrams has announced that she has already crossed the 600,000 mark in requested absentee ballots Georgia Republicans are busy fighting with each other. Indeed they are faced with two branches of their party one being a narrow Atlanta suburban Athens Savannah and Sea Island establishment GOP. The other a massive North and South Georgia Trump Republican party. With the silence of the Republican Governor Brian Kemp over the voting issues in Georgia both rank-in-file Republicans and many state leaders are bitterly divided. That is a house divided that must come together quickly and may not. Resentment towards Kemp among Trump supporters reeling from a loss many are suspicious of will make turnout for Perdue and Loeffler problematic. Kemp has been asked to call a special legislative session to clean up Georgia's chaotic absentee ballot laws but refuses to do so. And the early campaign messages in the two races may further complicate matters. Loeffler advocates have gone to the airwaves linking her opponent Raphael Warnock to support of the controversial Reverend Jeremiah Wright. While that may convert a few suburban white voters it could also inflame Georgia's phenomenally strong African American demographic. Whether it is the Wright commercial or something else you can bet that Loeffler will be accused of racism.📌s a time honored tradition in Georgia politics and trust me📌s coming. In Perdue's instance it appears that the well-worn📌he is liberal📌 TV ad (which rarely resonates with voters in Georgia) has been substituted with📌he's too social📌 version. Perdue's opponent Jon Ossoff has carefully cultivated image of a📌progressive moderate📌 Throwing the S word around won't do enough to dent the Democratic nominees. Just ask the esteemed last living pollster for Ronald Reagan Craig Keshishian. He flatly declares in a California version of our Georgia lingo 📌that dog won't hunt📌 And running Sen. Chuck Schumer in attack ads won't work either because most Georgia voters have only a vague concept of who he is or what he does. The winning Republican strategy must be hereofield. First the messaging to Atlanta suburban white voters many of whom are on the verge of becoming permanent Democrat voters must be specific as to how a victory for the Democratic nominees will impact them in a very personal way. That means ads showing solar panels being forced on their homes and social workers substituting for police. And for good measure a calculation of their soon to be new tax hikes in their city or county courtesy of lost revenues due to Covid might make these voters think twice about oncoming federal tax hikes. Secondly the huge Republican Trump base must be reengaged. Make no mistake these voters really could care less about the two U.S. Senators. They are completely devoted to Donald J. Trump and only Trump can deliver them back to the polls. In Georgia Trump not a political figure among most Republicans📌s closer to a religion. Finally let's return to that discussion of the recount: How about those many voters who have moved out of Georgia or who have not voted in ages but somehow managed to send an absentee ballot this go around? There is a short window in which under Georgia law their status can be challenged by appealing to their local county election board. The question is why are Republicans this far into the next round without any effort to do so? For the two Republican incumbents and for the balance of power in the Senate we are truly at📌the 10📌 lag📌 Now you know how to speak 📌Georgian📌.</p>
